## Crystal Clear Microdermabrasion

A progressive, not aggressive treatment. This is a skin resurfacing treatment which helps with a variety of imperfections. The crystals are blasted out of the handset on to the skin, where they gently remove the epidermal cells, layer by layer. The vacuum action draws away the used crystals and dead skin. This treatment can treat all skin types causing visible results with fresher and brighter skin after just one treatment. MDA can treat fine lines and wrinkles, pigmented skin, acne scarring, blackheads, open pores, milia, ingrowing hairs, recent stretch marks and recent scarring.

MDA Treatment (45 minutes)	<b>£53.00</b>

MDA Back Shine (30 mins)	<b>£37.00</b>
Wide Eyes (30 mins)	<b>£37.00</b>

MDA treatments are most beneficial following a course of treatments. We recommend once a week or once every two weeks to get the best visible results. However, these treatments are great to have as maintenance, for your skin to look its best at all times.

Milia are a collection of small white spots commonly known as milk spots. These tiny cysts are located immediately below the epidermis, the very outer layer of skin, making their distinctive colouring so visible. The white comes from an excess build-up of keratin. They can be found on adults faces and become permanent. While they aren't a medical risk, many people with milia would prefer to have them removed.
